Gain mastery, advanced tools and recognition as an innovation expert: Yellow, Green and Black Belt Grading

- Deepen your knowledge of innovation management methodologies
- Gain access to the full suite of Innovation360 tools and solutions
- Join a global community of experts and innovation thought leaders
- Consistently deliver world-class value to your clients

"The ongoing journey with Innovation360 team is both rigorous and invigorating. Without a doubt, it has greatly assisted me to fast track my vision of developing a best practice strategy and innovation advisory firm. You don't travel to Europe and the US from the other side of the world seven times in 18 months unless the research and project are clearly world-class and the support first-rate."

Peter Glasheen, Australia

IMBB Innovation Management Black Belt™

"I work in the Gulf region, one of the most dynamic regions in the world. By getting accredited as an Innovation360 licensed practitioner, I have been able to leverage my network and past experiences in a very comprehensive way. I am a proud part of Innovation360's movement connecting the world's leading innovation experts who are solving the great grand challenges of our time. "

Khaled Adas, Saudi & UAE

IMGB Innovation Management Green Belt™

90% of executives recognize that innovation is critical for growth, but just **6%** say their innovation efforts are working. The result is a massive demand for innovation experts who can deliver real results.

The market for digital transformation is on track to grow beyond **\$2.2 trillion** by 2025. Organizations of all sizes need innovation leaders with the tools and the framework to make the latest technologies work for them.

Innovation360 has condensed decades of academic research on innovation along with data from more than **5,000 companies in 105 countries** to create customized, precision insights for each and every client.

Global Thought Leadership

Why do some companies succeed, again and again, while others can never replicate an initial success, or fail entirely despite a very promising concept?

Is it luck, timing or strategy?

After working to turn around and scale up a number of companies, Innovation360 CEO and founder Magnus Penker became curious about why some companies are able to innovate consistently while others fail. Following businesses into the rabbit hole to answer these questions became his life's guiding mission.

Based on the best academic research and applied science, Magnus built an innovation framework to assess and measure innovation capabilities across an organization. Using this framework, Innovation360 has gathered data from companies on every continent, from entrepreneurial scale-ups to the largest exchange-traded funds.

Today, Innovation360's InnoSurvey® draws insights from the world's most comprehensive database of innovation projects, now including more than 5000 companies in 105 countries.

These insights into the fundamental nature of innovation form the heart of the Innovation360 Group's methodology. Our patented analytic tool, InnoSurvey®, and the framework that supports it, are not just theoretical but immensely practical, allowing us to assess an organization's readiness for innovation, establish a baseline and recommend an innovation strategy supported by the organization's unique capability profile.

Successful innovators do not come up with market winning ideas by luck or inspiration. Innovation is a highly structured process that converts market needs into realities with a precise execution plan. That structure is what allows successful companies to innovate over and over again.

The science of innovation management is still in its infancy. Our accreditation program will prepare you not just to deliver full-scale transformation projects, but also to play a role in defining emerging global standards. The International Standards Organization (ISO) is in the process of creating guidelines for innovation management under ISO 56000. As members of the working committee crafting these standards, a team of Innovation360 Licensed Practitioners are taking the lead in shaping the future.

The grand challenges of our time will call upon all of our innovative potential, and require a shared language and methodology for working together.

We are excited to help lead the charge, and invite you to join us.

INNOVATI°N 360

About Magnus Penker CEO of Innovation360

Magnus Penker is a highly sought-after CEO, author and speaker on topics related to innovation management, artificial intelligence, digitization, and business transformation. He has presented his original concepts at prestigious global forums and events, such as the Global Peter Drucker Forum, top-ranked international business and design schools, and in front of executives at the world's largest enterprises. Among his published works, the Five-Volume Series, *The Complete Guide to Business Innovation*, provides a concentrated introduction to his research and approach to innovation management.

Business Worldwide Magazine recognized Magnus as the 'Most Innovative CEO Sweden 2016' and he was chosen as a Global Top 100 CEO by CEO Monthly in 2018. Under his leadership, the Innovation360 Group has led regional development projects and expanded from its headquarters in Stockholm, Sweden, to offices in New York City, Toronto and Chicago.

To prove the value of his insights and theories, Magnus has launched 10 start-ups and has acquired, turned around, and sold over 30 enterprises across Europe. Innovation360 has guided clients on every continent, from entrepreneurial scale-ups to the largest exchange-traded funds and global 100 firms.

On a mission to establish a reliable innovation pipeline for sustainable growth and profits, Magnus continues to travel the globe delving deeper into the mechanics of bringing new ideas to life. He demonstrates how companies can experiment with radical innovation to extend their functional lifespan as long as possible, because every success means another company that can contribute to solving the world's greatest challenges.

The world is facing unprecedented threats to a sustainable future, with a need for powerful, original ideas to address issues such as access to clean water, better education, healthcare, an end to poverty, and smarter agriculture policies to support the growing population. The only way to solve these issues is through radical innovation and active experimentation.

It's clear that even though the world has never changed so much so quickly, it will never change this slowly again. Only a structured approach to radical innovation can help organizations operate at this speed and humanity reach its full potential.

"To be a world champion in anything, you must discover the source of your strength and then build on it. When its time to face competitors, an innovation strategy designed to highlight your own unique strengths will change the playing field."

- Magnus Penker -
